

Both Debbie and Patti have tailored the program to the needs and physical abilities of the residents and to the facilities where they live. At one housing unit, Titus Towers, the residents have an extensive garden plot with ten active gardeners. A gardener and a retired carpenter recently built a compost bin, which will be put to good use in the garden operation. A recent harvest luncheon from garden produce and from home-baked dishes was a big success. Another scheduled event, to be modeled after a farmers' fair, with booths where seed sprouting and plant propagation from cuttings will be demonstrated, may inspire others to join the gardeners. Indoor gardening keeps the interest going through the winter.

Raised planters are now used at Ithacare, both indoors and outdoors, and Patti hopes to expand their use to Oak Hill Manor, since they work so well for those in wheel chairs. An herb garden under lights is another project under way, and cuttings from the Cornell Plantations are now being rooted for winter pleasure. For less active senior citizens films and talks about gardening or flower arranging help bring the green world of plants into their lives.

When Debbie Krause was asked about the rewards of garden therapy, she said that she, too, benefited: "A most rewarding experience has been with a woman in her eighties at the Ithacare Center. She did not get involved in many other activities until the gardening classes started. Now she walks all the way to the plant-growing room with her walker. When she gets there, she puts the walker aside, leans up against the plant benches, and takes care of all the watering. Just seeing people get excited about plants makes me feel good."

We Appreciate Your Support

On behalf of the Cornell Plantations Committee, we want to thank each of you who helped make the 1978-79 fiscal year a highlight in the history of Cornell Plantations. The total unrestricted giving topped the \$78,000 mark — the highest one-year total ever.

We will do our best to carry forward your interest and support, which come at a time when a few more dollars are essential just to keep ongoing operations intact.

You will be glad to know that our many projects and programs are stimu-

lated and enriched by an ever-expanding interest in our thrust — by the entire Cornell community, our alumni, our sponsors, and many friends. From time to time we will provide more detail on the directions of our present effort.

We are looking forward to another exciting growing season in 1980.

Charles E. Palm, Chairman
Cornell Plantations Committee
